Student Rating of Instruction (SRI)

Hello, my name is Bella Snyder, I am a sophomore attending Wasatch high school and here is my student rating for the UVU online web dev class. Overall, the class was very easy to understand with the follow along videos and then adding it to your own website. I liked and disliked that this class was online. I like having human interaction for the class but by following the videos I was able to get ahead and if I missed a class, it wasn't the end of the world. The videos where very straight forward, and I would recommend this class to fellow students for the college credits and for the overall take away from this class.
